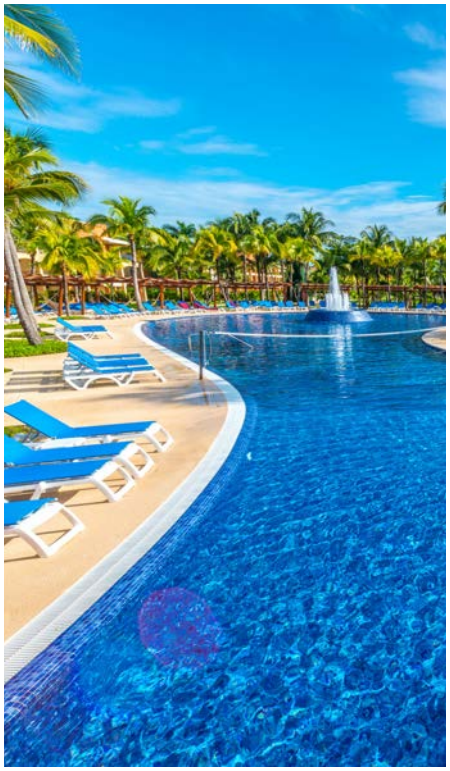
LEISURELINE - LAGOON & WATERPARK LINING SYSTEMS

INDUSTRIAL LININGS | WATERPROOFING | ROOFING | TURNKEY SOLUTIONS

THE LEISURELINE ADVANTAGE

Rapid installation – spray applied and seamless

VIP Leisureline systems are spray applied and seamless, instant curing solutions for containment and long term substrate protection of valuable water park assets.



Design

VIP Leisureline systems can be applied to almost any substrate of complex design including easily dressing over plinths, corners and parapets. The flexible spray applied material adjusts perfectly to the geometry of the substrate and provides a whole new world of design options for owners and architects.

Aesthetics and function

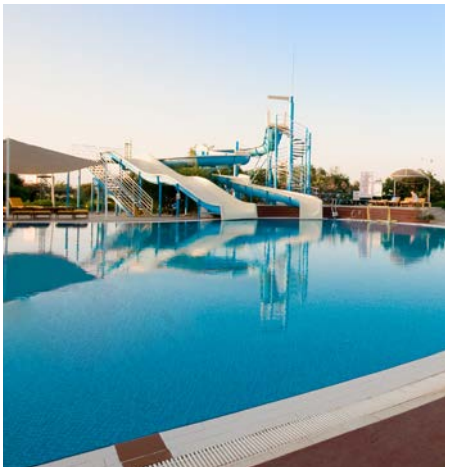
Revolutionary single product, single application, UV stable and colour fast systems provide not only superior function but long term aesthetics without the disadvantages associated with multi product and multi coat systems.

Slip resistant safety feature

Spas, Pools or Waterparks need to safeguard visitors against slip injuries. VIP Leisureline products can incorporate slip resistant mediums including clear mediums for visually sensitive areas through to aggressive aggregates for pump rooms and workshop areas. Leisureline products can be incorporated into the decorative elements and walkways as a colourful and attractive, slip resistant feature

Durability

Whether large or small, pools and lagoons are continuously exposed to mechanical stresses and stresses caused by UV sunlight, chlorine, chemicals and weathering . The VIP Leisureline systems are specifically designed to meet these challenges and will provide a long term, colour fast, aesthetically pleasing, protective solution.



Successful track record

VIP Leisureline products have a proven history in lagoons, swimming pools, aquariums and in hotel and resort water features around the world. Public swimming pool applications have been operating maintenance free since 2008.

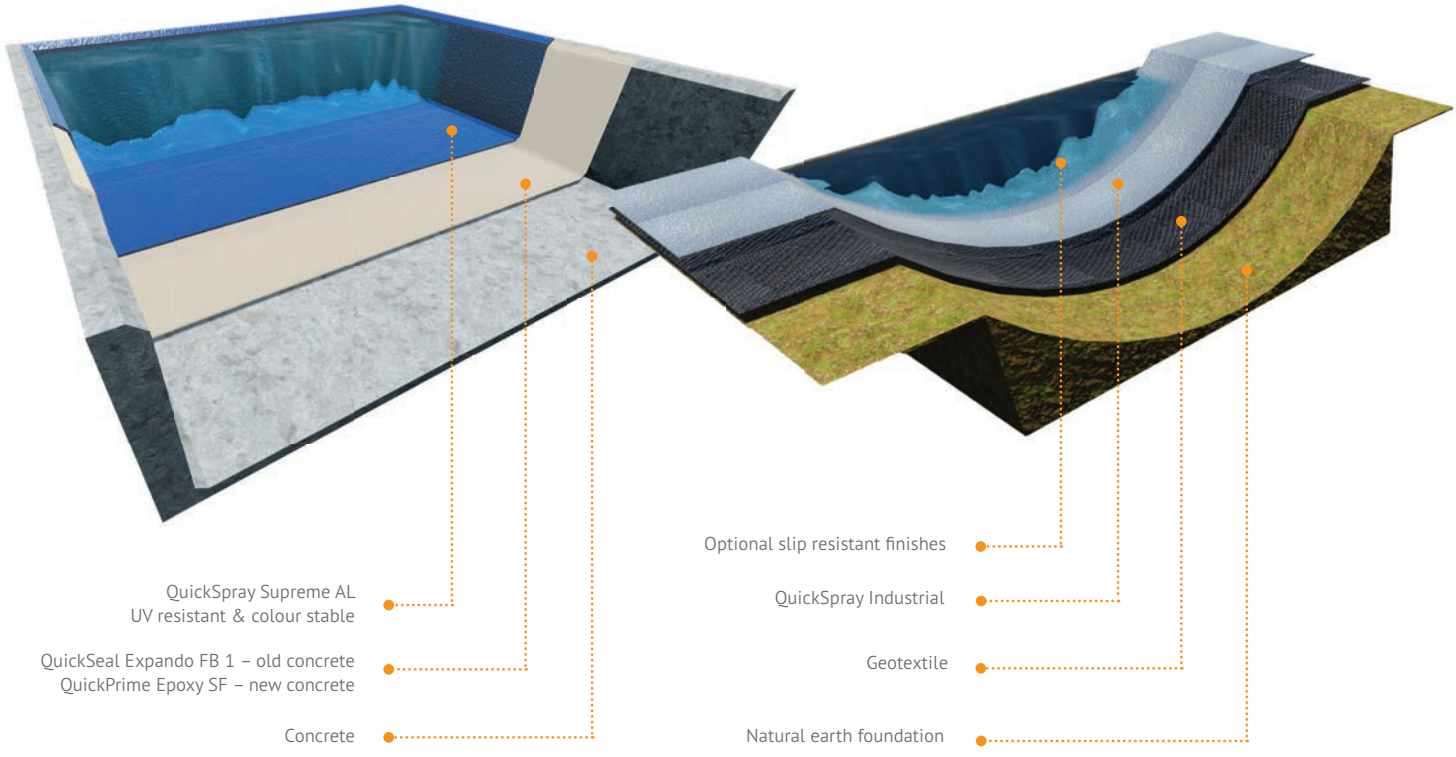
LEISURELINE SYSTEM

1 LEISURELINE Supreme

UV stable and colour fast, one product, one application system for the ultimate lagoon protective lining system with slip-resistant options.

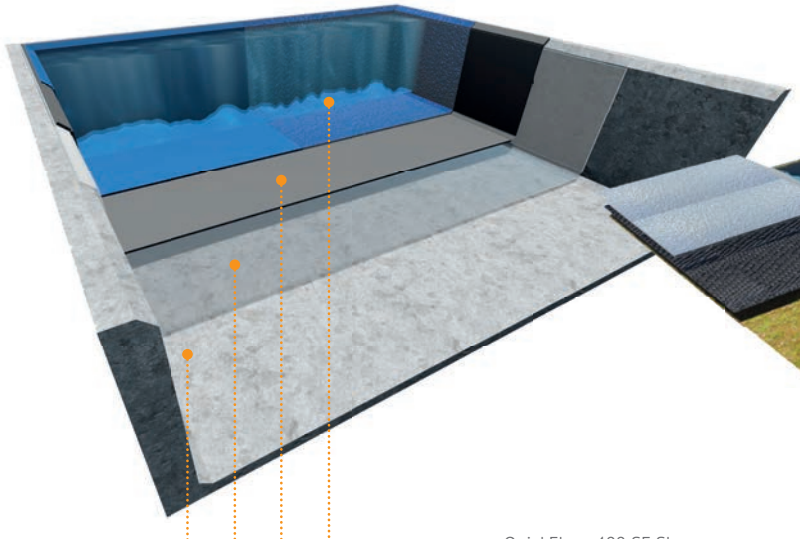
2 LEISURELINE Geo

Save on expensive structural concrete by using Leisureline Geo. Form channels, canals, ponds, natural water features quickly and easily with a natural compacted soil foundation and Leisureline Geo.



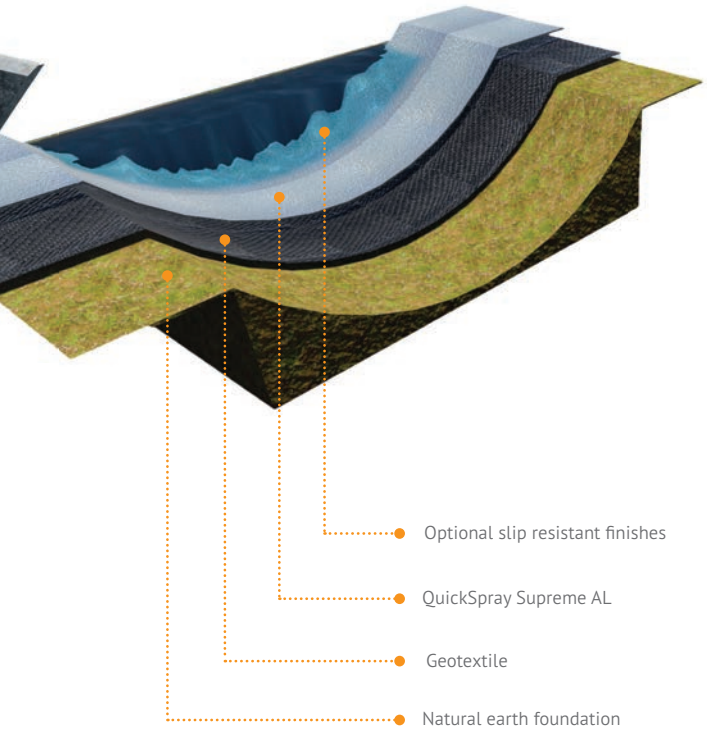
3 LEISURELINE Standard

Applied to concrete lined channels, ponds, water features and much more. Optional colour fast top coats and slip resistant finishes.



4 LEISURELINE Geo AL

LEISURELINE GEO AL is the perfect solution to save on expensive structural concrete in combination with a colour-stable aliphatic polyurea.



LEISURELINE KEY FEATURES

UV resistant & colour stable

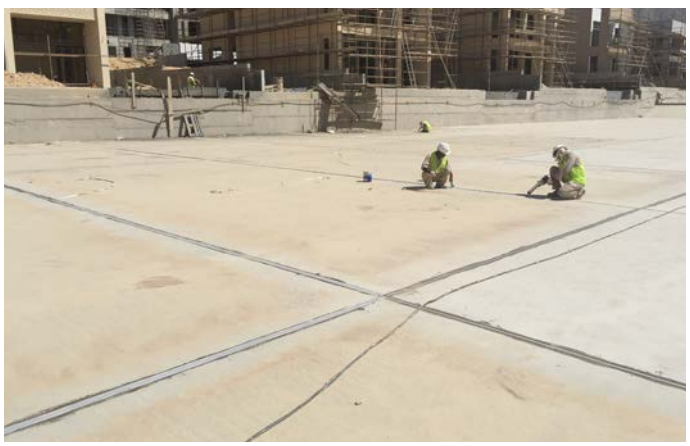
- UV stable coatings systems
- Single product, single application UV stable and color fast systems
- Aesthetically pleasing and functional finishes and color options
- Resistant to chlorine, salts and other water treatment chemicals

Excellent strength

- Very high tensile strength
- Very high impact and abrasion resistance
- Optimum resistance to high sheer forces
- High crack bridging ability
- Resistant to tearing and root penetration

Seamless & flexible

- Excellent elongation at break properties
- A seamless flexible finish that will not crack or peel



Quickprep repair products

- A full range of fully substrate compatible repair products are provided as part of the VIP Quickprep range
- Crack injection and filling materials can be overlaid within 10minutes

LINING SYSTEM RANGE

VIPSHIELD	Combo-protect system
QUICKDECK	Car park decking system
LIQUISHIELD	Fluid containment & lining
LEISURELINE	Lagoons & waterparks
CLEANCOAT	Clean & hygienic coatings for food & pharma
QUICKFLOOR	Superfast industrial flooring system

AQUA BY THE BAY LAGOON - FLORIDA

The Aqua Lagoon is a real estate project with apartments and premium lofts and a private access to the Aqua lagoon. It is an artificial lagoon with crystalline water and white sands to replicate the Caribbean charm. The southern zone of the lagoon has services, water games, restaurants and many other activities for people of every age.

The project was supplied and supervised with the LEISURELINE system by "VIP Freedom LLC".

AZHA RESORT

Less than two hours away to the east side of cairo, Ain El-Sokhna is located on the red sea few kilometers to the south of Suez cannal. This luxurious resort and private villa complex is part of the huge Sunrise group of hotels and has one of the biggest Crystal Lagoons in the region, and the second in a row to have aliphatic polyurea beach coatings with sand enhanced anti-skid finish.

The project included significant concrete repairs and rehabilitation before a 2.5mm thick lining system with a special sandy color od Ral 1001.
And will be expecting the second phase of this lagoon in one to two years with an area of almost 150% of this one.

SANTA ROSALIA LAKE RESORT

Another Crystal Lagoon has been completed in Spain. It is located in the Santa Rosalia Lake and Life Resort in Torre Pacheco. It is an exclusive resort for property owners only.
The resort has a 16,000 m² lagoon with a beach area and many facilities such as a beach club, restaurant, gym, stores and bars. It also offers many different sports activities such as mini golf, padel tennis, hiking trails, paddle boarding and kayaking.

The pool uses a special technology that ensures that the lake uses only half of the water normally used for a park with the same area. It has a closed-loop system that purifies and reuses the water, eliminating the need to renew water resources beyond evaporation.

For the beach area VIP's decorative lagoon and pool lining system LeisureLine was chosen. LeisureLine brings together the proven physical and application advantages of VIP's spray applied, instant curing flexible industrial lining systems with the aesthetic requirements of decorative pool and lagoon features.

BANGI WONDERLAND

The luxurious 5-star Mabu Thermas Grand Resort offers luxury accommodation set around tranquil pools and lagoons.

The pools and lagoons are an essential feature and attraction of the resort and critical to the resorts success.

Providing a long term waterproofing solution that enhanced the appearance and usability of the pools and lagoons was entrusted to VIP`s Leisureline pool and lagoon lining systems.

The Leisureline system provides the exceptional strength, impact and abrasion resistance of VIP`s toughest industrial linings with the aesthetic finish of a natural beach or lagoon.

Location	Kajang - Malaysia

Area	5.000m²
Construction Date	2020
VIP System	Leisureline Supreme

FLOWRIDER SUFPARK

Water, waves, surfing and lots of fun – all this is offered by FlowRider's surf parks.
One of FlowRider's surf parks is located in the Sommarland surf paradise in Telemark, Norway, which recently had to be renewed. It is a 200 m² FlowRider which is linked to the other fun pools in the complex.
The old Polyurethane coating was worn out and no longer functional, and our partner RECREA from Sweden was asked to renew the coating. Together, we decided on a customized LeisureLine Supreme System and added foam to replicate the Surfers Wave and to provide a long term-solution that will last for years to come.
After applying our QuickPrime 1K PU system, a special soft PU Foam was applied with our QuickFill SL Joint Filling System. A layer of QuickSeal MP250 Flexible Hybrid Polyurea was then applied to create a uniform seamless base layer. This was followed by the aliphatic, colour-stable QuickSpray Supreme AL over the whole repair area. Finally, the Polyaspartic QuickFloor 400 SF slow was applied in the main Surfing zone of the FlowRider to provide a very smooth gliding surface for the optimal wave experience.

ARTIFICIAL LAGOON NEAR MUSCAT OMAN

The Saraya Bandar Jissah complex is located on the outskirts of Muscat on a beach surrounded by the Hajar Mountains. Saraya Bandar Jissah will be home to 398 exclusive residential units, spacious hilltop villas, stylish duplexes and luxury apartments. The two beach front Jumeirah hotels form the major leisure components of Saraya Bandar Jissah, providing their guests with a luxurious and relaxing home.

One of the main attractions of the Saraya Bandar Jissah is the beautifull artificial lagoon. The entire area of the lagoon was sealed and protected with a VIP Leisureline system. Despite the beautiful scenic surroundings the environmental conditions are very challenging with extreme temperatures, high humidity , salty air and high levels of silt deposits in the lagoon area.

VIP System	QuickPrep concrete repair systems Leisureline Standard Optional TC100

WATERPARK SHARM EL SHEIKH

The Concord El Salam Resort located in Egypt is a 5 star hotel & resort. The resort overlooks the Red Sea in one direction and 5000 m² of water ponds, pools & mountain views in the other. From the outset all the water features and pools leaked and suffered surface discolouration. Maintenance was an on-going and very costly issue. High year round occupancy rates made major rectification works extremely difficult. Traditional options would simply take too long and did not guarantee future water loss if the concrete substrate continued to crack.

VIP`s Leisureline lining system provided not only a very fast application and return to service time but also due to its tremendous tensile strength and crack bridging properties a future guarantee of no water loss.

Client	Concord El Salam Resort & Spa

MBRC DISTRICT ONE LAGOON

This man made lagoon is the central focal point around which a new city is being built in honour of his Highness Sheikh Moham- med Bin Rashid Al Maktoum.

Initially designed to incorporate a 38 hectare crystalline lagoon with 14 ki- lometers of white sands, it will become the largest lagoon in the world once completed. Due to the success of the project, the developers have decided to add an additional 10 hectares of lagoon, taking the total lagoon area to 48 hectares.

Such a large and prestigious project re- quired the very best waterproofing and substrate protection solution. VIP was chosen as the supply and apply partner for this project.

TILAL AL GHAF LAGOON

Tilal Al Ghaf is a community that is intentionally and purposefully built on wellness, to benefit the individual, family, immediate community and Dubai itself. Tilal Al Ghaf is an ecosystem where all the parts are connected and play a role in developing residents and the functioning of the community.

The new lagoon at the heart of the community will offer a variety of water sports, such as kayaking and stand up paddling, fun activities for the kids and a night-time cinema, the lagoon makes an ideal location for every state of mind. This tranquil landscape is designed to the highest quality to meet the growing need for family units and integrated living.

The whole project was designed by Majid Al Futtaim - the leading shopping mall, communities, retail and leisure pioneer across the Middle East, Africa and Asia. VIP was awarded for supply and apply of VIP´s Leisureline decorative Lagoon and Pool lining systems.

LeisureLine brings together the proven physical and application advantages of VIP`s spray applied, instant curing flexible industrial lining systems with the aesthetic requirements of decorative pool and lagoon features.
